Introduction

1.1 Purpose

Mendeskripsikan spesifikasi teknis sistem sesuai dengan kebutuhan dari user yang disebutkan pada Form terlampir.

1.2 Background

Adanya peraturan PBI Nomor 23/11/PBI/2021 tentang Standar Nasional Sistem Pembayaran dan PADG nomor 23/15/PADG/2021 tentang Standar Nasional Open API, sehingga API yang telah digunakan oleh ACC untuk payment dan collection harus dilakukan enhancement system menjadi format SNAP API sesuai dengan ketentuan Bank Indonesia. Sudah terbit nya sistem pembayaran baru dari BI yaitu BIFAST yang memungkinkan pembayaran secara realtime dengan biaya lebih murah.

1.3 Objectives

- Enhancement Front End References

Below is the referenced document of this document

#	Document Name	Location
1	FD Pencarian No Registration based on No Identitas	
2		

1.4 Version History

Version	Date	Author	Description of Changes
1.0	10/10/2023	Teddy Kurnialana	Initiate.

Software Requirement Specification	PT CIPTA SEDAYA DIGITAL INDONESIA ©2023

2. Project Scope

2.1 In Scope

ID#	Originator (Project#, FD ID#)	Scope Item
TD 001	SNAP API Bank Permata untuk penerimaan	<ol style="list-style-type: none"> 1. Pembuatan API Token. 2. Enhance API Get Bill / Inquiry. 3. Enhance API Pay Bill / Payment.

2.2 Out of Scope

2.3 Effort Estimation

- Explore and design tables/queries
- Create logic to handle success/failed requests and develop the responses
- Testing
- Deploy services

Software Requirement Specification	PT CIPTA SEDAYA DIGITAL INDONESIA ©2023
Author	Teddy Kurnialana

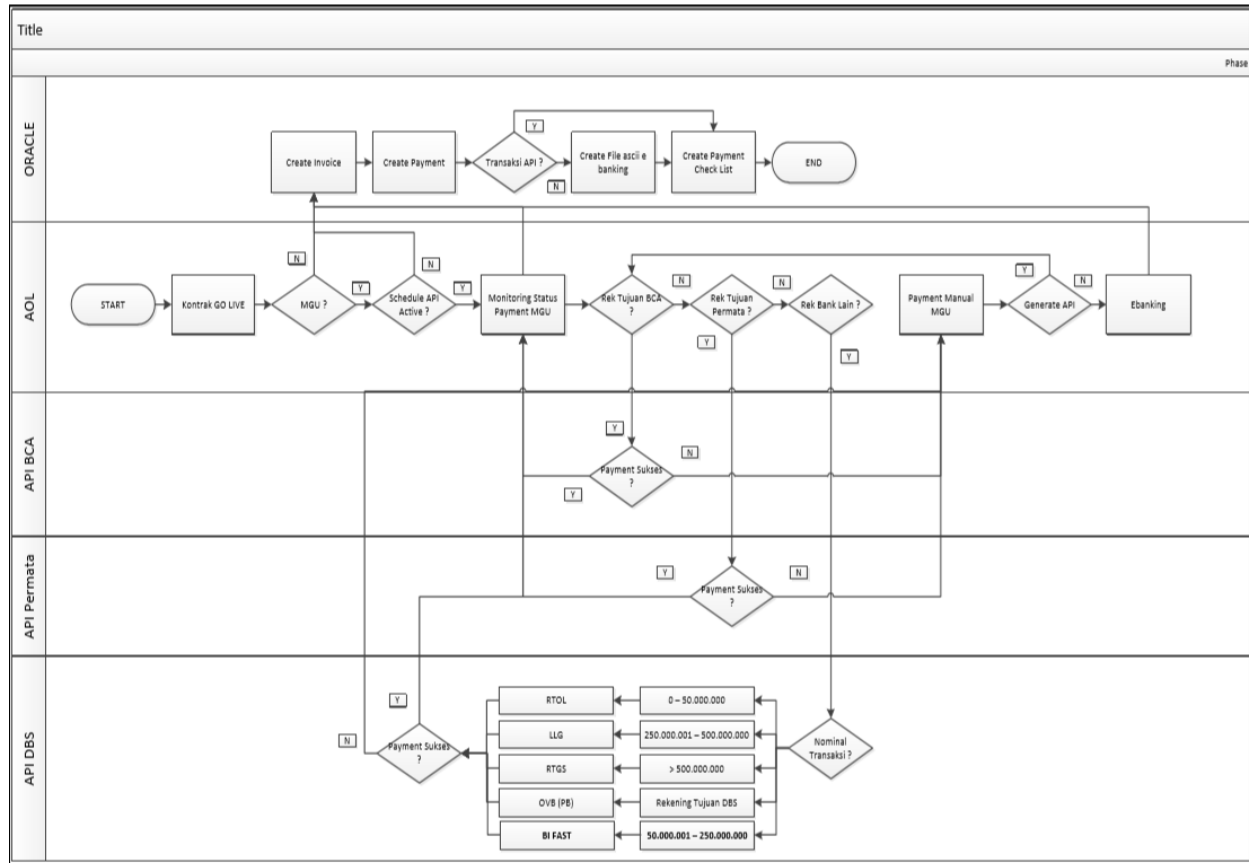

Customer Name	PT ASTRA SEDAYA FINANCE

6	Untuk rekening tujuan Permata maka akan menggunakan API Permata
7	<p>Untuk rekening tujuan non BCA dan Non Permata maka :</p> <ol style="list-style-type: none"> 1. rekening tujuan DBS : menggunakan jenis transaksi PB (OVB) DBS 2. rekening tujuan non DBS dengan nominal 1 – 50.000.000 : menggunakan RTOL DBS 3. rekening tujuan non DBS dengan nominal 50.000.001 – 500.000.000 : menggunakan LLG (SKNBI) DBS 4. rekening tujuan non DBS dengan nominal > 500.000.000 : menggunakan RTGS DBS
8	Jika payment sukses maka akan update data di monitoring status payment MGU, dan jika gagal maka dapat di generate ulang di AOL sehingga dapat di jalan kembali melalui API.
9	Jika tidak bisa di generate ulang di API maka user dapat generate ascii file e banking dan masuk seperti flow process dengan membentuk invoice, payment
10	Setelah data sudah di update sukses pada menu monitoring status payment MGU, maka akan membentuk invoice dan payment, namun tidak membentuk ascii e banking, dan langsung membentuk data payment check list

New Flow

Gambar 3.2 Flow Baru Pembayaran

Penjelasan :

No	Deskripsi
1	Kontrak valid
2	Jika kontrak valid non MGU maka akan masuk ke flow process regular yang sudah eksisting, dengan jadwal scheduler normal untuk pembentukan invoice, payment, ascii e banking dan masuk ke bucket payment check list
3	Jika kontrak MGU valid diluar batch API, maka akan masuk ke flow process regular yang sudah eksisting
4	Jika kontrak MGU valid sesuai dengan jadwal batch API, maka akan masuk ke bucket monitoring status payment MGU di AOL sehingga dibayarkan melalui API disesuaikan dengan masing – masing bank rekening tujuan
5	Untuk rekening tujuan BCA maka akan menggunakan API BCA
6	Untuk rekening tujuan Permata maka akan menggunakan API Permata
7	Untuk rekening tujuan non BCA dan Non Permata maka : <ul style="list-style-type: none"> 1. rekening tujuan DBS : menggunakan jenis transaksi PB (OVB) DBS 2. rekening tujuan non DBS dengan nominal 1 – 50.000.000 : menggunakan RTOL DBS

4. Requirement Detail

TD 001 – 1. Pembuatan API Token

Pembuatan API Token untuk akses ketika ingin hit API inquiry / get bill dan payment / pay bill.

Spesifikasi API :

Nama	Generate Access Token
URI	https://[hostname]:[port]..v1.0/access-token/b2b
Transport Protocol	HTTP POST
Message Format	REST / JSON
Interaction Type	Synchronous

hostname : permatadev.acc.co.id

Header			
Field	Mandatory	Description	Request
Content-Type	Yes	Media Type	application/json
X-TIMESTAMP	Yes	Time Stamp	YYYY-MM-DDTHH:MM:SS 2022-03-21T10:11:40+07:00
X-CLIENT-KEY	Yes	Client ID from Mitra	
X-SIGNATURE	Yes	Request Message Signature	String to sign: client id + " " + timestamp Signature: SHA256withRSA(private key, string to sign)

Request			
Field	Type	Mandatory	Description
grantType	String	Yes	Client credential
additionalInfo	Object	No	

```
{
  "grantType" : "client_credentials",
  "additionalInfo" : {
  }
}
```

Software Requirement Specification	PT CIPTA SEDAYA DIGITAL INDONESIA ©2023

Response			
Field	Type	Nullable	Description
responseCode	String	False	Response Code from Partner
responseMessage	String	False	Response Description
accessToken	String	False	Access Token
tokenType	String	False	Bearer Token
expiresIn	String	False	Expires 900s (15 mins)

```
{
  "responseCode": "2007300",
  "responseMessage": "Successful",
  "accessToken": "Xy8duZzAvv9bwDXxRxcb89tsuvk4MF4kx4lGfE4aCRVxR7XdERhbe1",
  "tokenType": "Bearer",
  "expiresIn": "900"
}
```

Menyesuaikan error code dengan kondisi yang di sediakan oleh Permata. Insert ke table `mst_ws_resp_va`

Token	
2007300	Success
4007301	Invalid field format {field_name}
4007302	Missing Mandatory Field {field_name}
4017300	Unauthorized Signature
4017301	Invalid Token
4037315	Transaction Not Permitted.[Reason]
4047312	Bill Not found
4047313	Invalid Amount
4047314	Paid Bill
5007300	General Error
5047300	Timeout

TD 001 – 2. Enhance API Get Bill / Inquiry

Enhance API Get Bill / Inquiry untuk melakukan pengambilan data VA beserta nominal yang harus dibayarkan

Spesifikasi API :

Nama	API Virtual Account - Inquiry
URI	https://[hostname]:[port]..v1.0/transfer-va/inquiry
Transport Protocol	HTTP POST
Message Format	REST / JSON
Interaction Type	Synchronous

hostname : permatadev.acc.co.id

Header			
Field	Mandatory	Description	Request
Content-Type	Yes	Media Type	application/json
Authorization	Yes	Contains authorization Token	Bearer Token
X-TIMESTAMP	Yes	Time Stamp	YYYY-MM-DDTHH:MM:SS 2022-03-21T10:11:40+07:00
X-SIGNATURE	Yes	Request Message Signature	<p>String to sign: HTTP method+":"+endpoint url+":"+access token+":"+lowercase(hexEncode(sha256(minify(request body))))+":"+ timestamp</p> <p>Signature: HMAC_SHA512(client secret, string to sign) with client secret</p>
X-PARTNER-ID	Yes	Unique Partner ID	
X-EXTERNAL-ID	Yes	Unique Reference Number	
CHANNEL-ID	Yes	Channel Code	751

Request			
Field	Type	Mandatory	Description
partnerServiceId	String	Yes	Institution Code (8 digits left pad with space)

Software Requirement Specification	PT CIPTA SEDAYA DIGITAL INDONESIA ©2023
Author	Teddy Kurnialana

Customer Name	PT ASTRA SEDAYA FINANCE
